Whois History API

You can fetch the above results using our Whois History API.

```
http://api.whoxy.com/?key=xxxxx&history=ikunjiang.com
```

Whois History API returns all the historical WHOIS records of a domain name that is saved in our local database.
This API call does NOT query the live WHOIS servers, and only returns the records present in our database.
In case Zero WHOIS records are present in our database, you will NOT be charged any API queries.

Sample Output: JSON Schema • XML Schema • JSON Live Results • XML Live Results

WHOIS HISTORY PRICING	TOTAL API CALLS	PRICE
